Format Usb Drive For Both Mac And Windows

Even if your external hard drive doesn't come pre-formatted in FAT32, you can format it yourself using either a Mac or Windows PC.. If you want to use FAT32 on a shared USB drive, use Mac OS. The only hard drive format that can be reliably used by both is called FAT32, or MS-DOS FAT as it's called on Mac computers.. Living with Windows: sharing drives There is a third format that both Mac OS X and Windows can read and write to natively: FAT32.
